

QUAKERCOOL 7101 LF

DESCRIPTION, OPERATION & MATERIALS

QUAKERCOOL 7101 LF is a biostatic high performance coolant with a medium mineral oil content. Developed for machining aluminium alloys with medium to high levels of Silicon and Copper, as well cast-iron and steel. Its lubricating performance is very good, due to a careful blend of ester and anti-wear additive. **QUAKERCOOL 7101 LF** is ideally suited for traditional machining operations as well applications requiring a high surface.

- All machining operations on aluminium alloys and steel and cast-iron.
- Concentration range: 6-10%, depending on the difficulty of the operation.
- Waterhardness: 90-350 ppm (9 -35° TH, 5-20° dH).

BENEFITS

- Good sump life.
- Good Magnesium stability
- .
- Good filterability.
- Good biological and fungal stability.
- Good corrosion properties.

TYPICAL PROPERTIES - CONCENTRATE

STORAGE, SAFETY & DISPOSAL

Quaker Chemical can supply this quality product in drums, in containers and in bulk. Other packages can be made available by Quaker Chemical or by distributors upon request.

As with all metalworking products, **QUAKERCOOL 7101 LF** should be stored in dry conditions and protected from extreme temperatures: 4-35° C is the recommended storage temperature.

QUAKERCOOL 7101 LF is unlikely to present any significant health or safety hazard when used as recommended by Quaker Chemical. Good standards of personal and industrial hygiene are to be maintained by the user (see Material Safety Data Sheets).

In order to protect the environment, the product used should be safely disposed by a licensed contractor. The packaging material should be handled by a recognised reconditioning firm.

Prior to using this product, consult the Material Safety Data Sheet for instructions regarding safe handling and environmental issues.
